# Shorthorns . . .

Shorthorns have been part of the American cattle scene almost from its beginning. The first exportation of Shorthorn cattle, then called Durhams, left England in 1783 and was sent to Virginia. These were both milk and beef type. In 1791 a shipment went to New York State. The first registered Shorthorn bulls imported to the United States were brought into the Genesee Valley of New York in 1817 by Samuel Hopkins. Then, between 1820 and 1850 many Shorthorn cattle were imported—mostly to Kentucky and Ohio for these were areas which were very productive of the feeds needed to fatten cattle, namely grass and corn. Ohio can also claim the distinction for the first real development of the polled Shorthorn—somewhere around 1870.

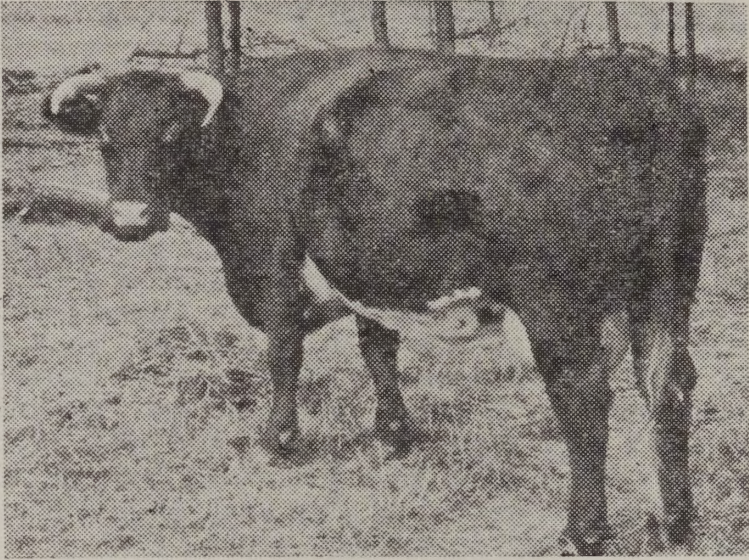

The American Shorthorn Breeders' Association was established in 1882 and the Polled Shorthorn Society was established as a branch of the Association in 1889. Both types are now recorded in the same Herd Book with a prefix "X" denoting a polled animal.

The Shorthorn breed of cattle is very commonly referred to as the "red, white and roan" breed. In the breed's early development breeders paid little attention to color. Later considerable preference developed for red cattle, but following the use of some outstanding white sires, cattle of white and roan were considered quite acceptable. Roan has always been an extremely good color in the breed, particularly if the roan is of a dark hue. The red color may vary from extremely dark red to a light red; cattle that are designated as red commonly have small areas of white on the underline. Shorthorns may also be spotted or have well-defined areas of red and white.\*

Because of their mild disposition and constant ability to gain, Shorthorns are found being used with the commercial herds and crosses as well as in the pure-bred herds. They retain a prominence in all the major show-rings across the country. The Shorthorn cow's ability to raise her calf through her own milking ability makes the breed stand out among beef animals. Shorthorns are found in practically all countries, being most prominent in the British Isles, Argentina, Australia, South Africa, and of course, the United States and Canada. It is a breed to be proud of with a heritage to preserve.

\*Excerpts from "Modern Breeds of Livestock", by Hilton M. Briggs; Published by the MacMillan Co., New York.

**"HDG Beauty Mary 3011-349"**

One of the Foundation Beauty Marys still strong  
at 11.

**"Herd Classified" November 6, 1969**  
**of 17 eligible for classification**  
**8 AA's and 9 high A's**

Any knowledgeable cattleman would realize cows are not at their best in November; in addition, Mr. Swaffar's tough approach to the NEW TYPE must be considered in any comparison. We are on a grassland program and no special effort was put into the classification; they stood just as they always have at that time of year.

**Three Things**

**You can expect and genetically depend on  
with cattle purchased from this herd**

1. Near perfect udders—No bottle teats, no poor milkers, no pendulous udders and no extra teats.
2. Wide Flat Rumps—almost eliminates calving problems and a prerequisite to long lasting good udders.
3. Reasonably Good Size—R.O.P. and Performance tested.

# Pennsylvania Shorthorn & Polled Shorthorn Breeders

(Refer to pages 3, 5, 7, and 11 for Breeders' names)

34

## WHY BUY SHORTHORNS?

- Shorthorn bulls are active, sure breeders.
- Shorthorns put more growth into their calf crops.
- Shorthorns are historically known for their faster gaining and finishing ability. The demand for Shorthorn and Shorthorn crossbreed feeders far exceeds existing supplies. Consequently, they sell for a premium.
- Shorthorn bulls put more milking ability into their daughters . . . this means heavier weaning weights.
- Shorthorn docility is world famous making them ideal projects for youngsters.
- Shorthorns are known as "The Great Improvers". Shorthorn crosses have been proven in test after test to be superior to other crossbreeds in milking ability, rate of gain and feed efficiency.
- Ask yourself why so many commercial herds are now crossbreeding with Shorthorns? **It's because they are best in every weigh?**

Halter broken steers—heifers—cows

and bulls for sale

Pennsylvania Shorthorns and Polled Shorthorns have proven their superiority at all major shows where they have been exhibited. The long list of championships, first-place winners and top-sellers is indeed a compliment to Pennsylvania Shorthorns and breeders alike.

## MAJOR EASTERN SHOWS

The Penna. Exposition is Pennsylvania's largest livestock show. This annual event held at the Farm Show Building, Harrisburg, draws the best livestock in the nation. The 1970 Exposition will be from Sunday, November 7 to Saturday, November 14. The judging of Shorthorn breeding cattle will be on Thursday morning, November 12. The feeder calf pens will be judged on Tuesday, November 10 and sold on Thursday morning, November 12. Both steers and heifers compete in this event. The interbreed Grand Champion Pen of Calves in 1967, 1968 and 1969 was a pen of Pennsylvania Shorthorns.

The Eastern National Livestock Show held each year at the Maryland State Fairgrounds, Timonium, Maryland, is scheduled for Saturday, November 14 through Wednesday, November 18. This show, too, draws Pennsylvania Shorthorns along with many other top herds of International Prominence. Shorthorn breeding cattle will be judged on Tuesday morning, November 17. Feeder calf pens will be judged on Monday, November 16 and sold on Tuesday, November 17. This major show is only a short driving distance from Pennsylvania and offers another excellent opportunity for Pennsylvania cattlemen to evaluate their herds.

The Pennsylvania Farm Show is held each year in January at the Farm Show Building in Harrisburg and is open to Pennsylvania breeders only. The 1971 Farm Show is scheduled for the week of January 11. Shorthorn breeding cattle will be judged on Wednesday, January 13, starting at 12:00 noon.

## THE WINNER

The Penna. Shorthorn Breeders' Ass'n. sponsored a promotional contest that was designed to encourage the use of mobile and stationary signs to advertise our great breed. The winner of this contest was the above eye-appealing entry from:
